

Cochise County Fair, Department E-I, Canning, 2019

Superintendents: Monica Cañez, 249-5429

Linda Wheeler, 559-2715

Entries will be received on Wednesday, September 25 from 10 a.m. until 8 p.m., and again on Thursday September 26 from 7 until 9 a.m. All judging will begin at 9 a.m. on Thursday, September 26. Please fill in your entry form and individual exhibitor's tags. These may be secured from the Department Superintendents or at the Exhibit Office in the Agriculture Building.

Youth or students: Any entry by a Youth exhibitor (18 years or younger) may be made in any class and lot by adding the letter "J" to the lot #. All youth must add a "J" after each lot # or, the entry will be judged in the Adult Division. If entries are commercially or professionally done, mark "C" on entry tag and jar label.

All fruits and vegetables must be in standard pint and quart jars or 4, 6 and 8 oz. jars. Dried fruits and vegetables should be in standard pint or quart jars. Jelly must be in jars with lids, no paraffin wax and must be sealed. Entries in classes 32, 33, 34, 35, 36, 37, 38, and 39 will be opened by judges for testing. All entries must be labeled as to contents, method of canning, (water bath or pressure) and dates canned. Jar caps and rings should be clean, without rust. Outside of jar should be clean, not sticky. Contents, except for meats, should be covered by liquid and should not touch lid. Proper seal is important.

FRUITS: Uniformity of pack and ripeness is very important. The ripeness determines the color and texture of the fruit. The syrup or liquid should be clear, not cloudy, and should cover the contents.

VEGETABLES: Here again the liquid is very important. It must be clear and cover the vegetables.

PICKLES/RELISHES: All cucumbers and mixed pickles must be firm and crisp. Sweet pickles firms, yet tender, don't overcook. Again natural color of product used, clearness of liquid and uniformity of pack is important. Liquid should cover contents. Flavor is a vital factor in this class. In pickling fruits, don't get them too sweet. Vegetables should not be too sour or over spiced.

JAMS/CONSERVES: Do not sieve or strain. True jams resemble crushed fruit with no separation of fruit and juice. Natural fruit flavor should be preserved. Jams should not be rubbery.

JELLIES/MARMALADES: Jelly must be transparent and have good texture (quiver) and color. It should maintain the natural fruit flavor, without crystals. Write on the entry the type of fruit used.

PRESERVES: The color and flavor must be natural to the fruit. Syrup should be clear and thick, the pieces of fruit firm and whole.

MEATS: Broth should come to 1" from top. Meat should be packed consistently. Meats must be pressure canned.

BUTTERS: Should be pureed with no chunks and about the consistency of thick honey. All canned food should be natural color, no coloring added.

DRIED FOODS: Color characteristic and shape are important. Jar should contain little amount of air and have vegetables that are brittle and fruits that are bendable and leathery.

For herbs, see Department B — Fruits, Nuts and Herbs.
